

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Identify tangents, secants, and chords.
Use properties of tangents to solve problems.

116 Angle Relationships in Circles
114 Segment Relationships in Circles

GLE Standards 7-8 Students prove and use theorems involving the properties of parallel lines cut by a transversal, the properties of quadrilaterals, and the properties of circles. 11-12 Students prove and solve problems regarding relationships among chords, secants, tangents, inscribed angles, and inscribed and circumscribed polygons of circles.

LINE AND SEGMENTS THAT INTERSECT CIRCLES

Example 1: Identifying Lines and Segments that Intersect Circles

Identify each line or segment that intersects $\odot L$.

Chords: \overline{JM} , \overline{KM}
Secant: \overrightarrow{JM}
Tangent: \overline{m}
Diameter: \overline{KM} Radii: \overline{LJ} , \overline{LM}

Example 2: Identifying Tangents of Circles

Find the length of each radius. Identify the point of tangency and write the equation of the tangent line at this point.

radius of $\odot R$: _____
radius of $\odot S$: _____
