

Download File PDF Proposal For Civil

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

2. **By topic.** In this case, if different authors or writers have the same opinion about the same topic, the topic is discussed and cited under the names of the authors or writers. This is a summary of their opinions. This is to avoid separate and long discussions of the same topic.

Example: It has been found out that praise is an important aid in learning of children. (Enriquez, 1981)

3. **Chronological.** Related materials may also be cited chronologically, that is, according to the year they were written. Materials which were written earlier should be cited first, before those which were written later. This can be done especially when citation is by author or writer. If citation is by topic, chronological citation can be done in the footnote.

C. **What to Cite**

It should be emphasized that only the major findings, ideas, generalizations, principles, or conclusions in related materials relevant to the problem under investigation should be discussed in this chapter. Generally, such findings, ideas, generalizations, principles, or conclusions are summarized, paraphrased, or synthesized.

D. **Quoting a Material**

A material may be quoted if the idea conveyed is so perfectly stated or it is controversial and it is not too long. It is written single spaced with wider margins at the left and right sides of the paper but without any quotation marks.

Example: Suppose the following is a quotation: Said Enriquez, Praise is an important factor in children's learning. It encourages them to study their lessons harder. Praise, however, should be given appropriately.

Justification of the Study

It should be made clear that there is no duplication of other studies. The present inquiry may only be a replication of another study. It should be stressed also that in spite of similar studies, the present study is still necessary to find out if the findings of studies in other places are also true in the locale of the present study. There may also be a need to continue with the present investigation to affirm or negate the findings of other inquiries about the same research problem or topic, so that generalization or principles may be formulated. These generalizations and principles would be the contributions of the present investigation together with other studies to the fund of knowledge. This is one of the more important purposes of research: the contribution that it can give to the fund of knowledge.

Synthesis

It should be emphasized in this area that the major findings, ideas, generalizations, principles or conclusions in related materials relevant to the problem under investigation. Generally, such findings, ideas, generalizations, principles or conclusions are summarized, paraphrased, or synthesized.
